Re: Regulated Heavy Metals

This letter is in response to your request for information regarding Reduction of Toxics in Packaging and compliance to TPCH Model Toxics in Packaging Legislation.

We have established through certification from our raw material supplier(s), and/or through independent laboratory analysis that Cadmium, Hexavalent Chromium, Lead, or Mercury are not present in our packaging products, or have any incidental concentration levels that exceed 100 parts per million.

In addition, Cadmium, Hexavalent Chromium, Lead, or Mercury are not intentionally added, or used in our manufacturing process.

Regards,

Randy Samples
Quality & Food Safety Director
